## ACADEMIC PROJECTS

---

Front-End Project

December, 2021-February, 2022

Project Details & Outcome: Collaborated with a team to research data and code with JavaScript functions, DOM manipulation, and API connections for a web page and assisted with CSS styling.

Back-End Project

February, 2022-February, 2022

Project Details & Outcome: Partnered with teammates to setup the JSONwebtokens to use for authentication. Created the registration and login pages using JavaScript and Sequelize/Elephant SQL for the database. Setup routing throughout a website as the logged in user and administrator with special administration rights. Coded the "submit bid" functionality that saves users bid in the database.
